FINANCIAL DOCUMENT TEST PACK

12 synthetic scenarios | Bank + CRIB-style pairs

SYNTHETIC TEST DOCUMENT - NOT VALID FOR FINANCIAL USE

Scenario matrix

CASE	INCOME*	DEBT / MONTH	LEASE REQUEST	EXPECTED ACTION
S01	150,000.00	20,000.00	25,000.00	capacity pass
S02	120,000.00	30,000.00	35,000.00	capacity pass
S03	95,000.00	25,000.00	30,000.00	manual review
S04	100,000.00	70,000.00	10,000.00	capacity exceeded
S05	100,000.00	45,000.00	15,000.00	capacity pass
S06	100,000.00	45,000.00	15,000.01	capacity exceeded
S07	80,000.00	15,000.00	20,000.00	capacity pass
S08	180,000.00	35,000.00	25,000.00	manual review
S09	140,000.00	25,000.00	30,000.00	manual review
S10	130,000.00	Missing	25,000.00	manual review
S11	0.00	10,000.00	5,000.00	manual review
S12	160,000.00	20,000.00	30,000.00	manual review

* Monthly income assumptions for verified test ground truth.

S01 Stable salary, low debt

S02 Multiple verified income sources

S03 Variable self-employed income

S04 Existing debt exceeds capacity

S05 Exactly at the 60 percent boundary

S06 One cent above the boundary

S07 Transfers and reversals are not income

S08 Current arrears and adverse history

S09 Disputed facility with uncertain liability

S10 Monthly installment missing

S11 No qualifying income; savings and loan proceeds

S12 Applicant identity mismatch

SYNTHETIC

FINANCIAL DOCUMENT TEST PACK

How to run and interpret the test fixtures

SYNTHETIC TEST DOCUMENT - NOT VALID FOR FINANCIAL USE

1. Choose a paired scenario

Each Sxx folder contains a 6-page bank PDF, a 3-page credit report, and expected.json with transaction-level and facility-level ground truth.

2. Exercise your document pipeline

Upload the original PDFs for layout/table extraction. S07 and S08 include image-only scanned versions for OCR. Read all report pages.

3. Compare extraction with expected.json

Check money-in, money-out, running balances, monthly installments, outstanding principal, arrears, dispute status and identity matching.

4. Classify and verify income

Exclude own-account transfers, loan proceeds and reversed purchases. Business income assumes the explicit 15,000 monthly supplies cost.

5. Apply the project research rule

Cap = floor(verified monthly income x 0.60 to cents). Compare existing verified debt plus requested lease. No bureau or approval grade is assigned.

6. Keep review cases unresolved

Missing installments, disputes, no income and identity mismatch are not normal capacity passes. Adverse history needs separate risk review.

7. Understand the scope of validation

Arithmetic and generated PDFs are checked; this pack does not prove live Azure OCR, production parser success or real approval accuracy.

8. Add more scenarios

Edit CASES in generate.py and run it with its Python dependencies. All files remain synthetic; no original personal identifiers are copied.
