* Bureau scores and probabilities are assigned synthetic values, not official calibration.

Every A1-A3 / B1-B3 / C1-C3 / D1-D3 / E1-E3 subgrade and XX has a paired folder.

Project lease grades are derived separately using the checked-in V1 scoring contract.

Family A: 100 / FastTrack. B: 80 / Proceed. C: 55 / ManualReview.

Family D: 40 / Escalate. E: 0 / Reject. XX: verify manually; no A-E grade assigned.

All requests use LKR 20,000 per month, supplied in expected.json rather than bank PDFs.

Bank arithmetic and daily average balances are independently recorded in ground truth.

Income consistency and default history are explicit reviewer assumptions for fixture scoring.

The CRIB structure follows the supplied specimen; fictional branding identifies the copies.

Run the real OCR/verification pipeline separately. These files do not prove parser success.
